Designed For Neonatal Nurses... By Neonatal Nurses!

The babyLance™ safety heelstick has earned worldwide popularity for its smooth and accurate incisions, ease of use, and safety features.

Cut Comparison

**babyLance**
The babyLance cut profile illustrates a gently arching incision that lacks a blunt puncture mark or inconsistent, jagged cut.

**ITC Tenderfoot™**
The ITC Tenderfoot cut profile illustrates an incision with a plunging, multi-angled puncture and a jagged, lopsided “W” pattern.

**Cardinal gentleheel™**
The Cardinal Health gentleheel profile illustrates an incision with an angular initial puncture, followed by an increasingly deep arc.

**BD Quickheel™**
The BD Quickheel cut profile illustrates an incision with an initial blunt puncture followed by a slicing action.

Features, Benefits & Value

**A Family of Sizes**
A comprehensive offering of incision depths designed to provide optimal amount of capillary blood with the least amount of trauma.

**Safety First**
Reduce accidental sticks/cuts with pre-loaded blade that automatically retracts after use.

**Reduced Trauma**
babyLance follows CLSI-LA4-A5 guidelines; providing a smooth arching incision to reduce excessive trauma to the baby.

**Precision Targeting**
An easy to activate trigger, incision indicators, and grip dimples help prevent slipping in your hand.
Instructions For Use

1. Select an incision site on the flat bottom surface of the heel, then clean the area.

   Note: Refer to sizing chart for suggested lancet size.

2. Remove the Trigger Lock, but do not pull back the Trigger until ready for use.

   Note: Trigger lock can easily be removed by twisting. Do not pull back trigger lock to remove.

3. Align the blade slot's visual marking with the incision site and pull the Trigger back with your index finger. Discard.

   Note: Place flush on site location. Do not push down or rock device when activating the trigger.

4. Gently wipe away the first droplet of blood, then collect the desired quantity.

   Note: It is NOT recommended to milk/squeeze heel.

Cut Information

BabyLance's proprietary internal spring activates the blade's swift pendulum action—delivering an ultra-smooth incision that complies with CLSI LA4-A5 guidelines to reduce trauma to an infant's delicate subcutaneous tissues.

*Recommendation only, use clinical judgement.

The gently arching incision (white dotted line) is measured by the maximum length and the maximum depth.
- Blade width 3.0 mm (+/-0.5 mm)
- Blade thickness 0.15 mm (+/-0.2 mm)

CLSI
Guideline for Max. Incision Depth: <2.0 mm

- Quickheel**: Average Incision Depth: 1.27 mm
- Gentleheel**: Average Incision Depth: 1.16 mm
- Tenderfoot**: Average Incision Depth: 1.35 mm
- babyLance**: Average Incision Depth: 0.92 mm
